

Aeration Committee
Agenda for January 11, 2002 Meeting

1. Presentation by Jones & Stokes of draft report regarding Aeration Technology Performance Evaluation. Jones & Stokes will discuss their findings from the late summer field testing, literature review on aeration technologies and presentation of a aeration scenario for the DWSC for the purposes of presenting preliminary cost analysis. Jones & Stokes will provide copies of the draft report at the meeting.
2. Discuss using the Port of Stockton's aerator for mass transfer efficiency studies and data gathering. The Port has developed an aerator and evaluation of the aerator may be incorporated into Jones & Stokes current ongoing work or be developed as a new study for 2002/2003.
3. Identify areas for additional aeration study/research in 2002/2003.
4. Discuss development of an RFP to address additional study needs. Set schedule to draft and complete RFP. (This work needs to be substantially completed by mid April 2002 and coordinated with Steering Committee).
5. Set next meeting date.
6. Selection of a new chair for the Aeration Committee.
